AES with SAP

According to Gartner, 47% of organizations plan to move their core ERP systems to the cloud within the next five years.

Emergys Accelerated Enterprise Solutions (AES) with SAP, powered by SAP Business All-in-One, provides a complete suite of business critical cloud applications that combine 70+ industry leading best practices, end-to-end processes, and dynamic analytic capabilities that integrates with both cloud and on premise systems.

Companies can access SAP remotely, share common resources, lower maintenance requirements, and scale elastically as they grow.

Emergys' AES with SAP solution is powered by SAP® Business All-in-One, one of the most powerful, industry specific enterprise resource planning solutions available to mid-size or rapidly growing small companies. SAP® Business All-in-One, provides an integrated view of your business and easily scales and adapts to meet changing needs. The solution helps drive business growth, builds and maintains operational excellence, and optimizes financial performance.

Derived from experience gained from hundreds of SAP projects over the last 15 years, Emergys developed a comprehensive foundation based on 70 + leading business practices that are common among most industries.

Utilizing a combination of SAP's building block methodology, and cloud delivery model, Emergys' solution is affordable, flexible, and delivers cross-industry core business functionality from day 1.

Our AES with SAP solution is comprised of:

- SAP Common Practices – Provides a solid foundation for prepackaged, ready-to-use, Business All-in-One solutions including Financial Accounting, Cost Controlling, Sales & Distribution, Materials Management, Production Planning, and Service Management.
- Emergys Value-In Enhancements – Applications and tools such as Workflow, EDI, Business Objects, S&A, NetWeaver, Portal, COPA, Mobility, and spreadsheet automation that enables businesses to implement and adapt an SAP All in- One solution
- Industry Specific and Cross-Industry Functionality – Can be easily customized and combined to meet your organizational needs.

With AES with SAP, you have the option to choose which applications you wish to consume in a cloud environment, allowing us to deliver “Your Cloud, Your Way.”

Extending SAP to

Meet All Your Business Needs

AES with SAP is preconfigured to deliver additional value to our customers with Data, Integration Points, Cloud Enablement, and Enterprise Experience.

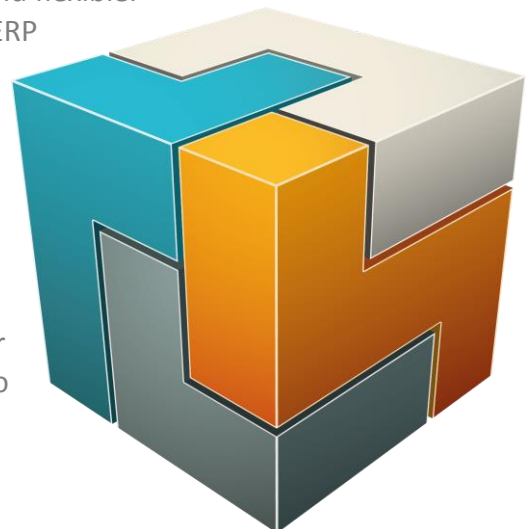

Data: Today, business intelligence and analytics capabilities are critical in gaining a competitive edge, which is why AES with SAP solution comes prepackaged with SAP HANA, business intelligence software (Business Objects), 25+ pre-configured reports and dashboards available to visualize your data and make more informed business decisions.

Integration Points: AES with SAP is delivered pre-configured with 10+ Integration Points, promoting accelerated application integration of our solution with additional SAP applications and business critical third party applications. Emergys is a leader in application integration, helping our customers accelerate and streamline the implementation process, extend their current technology investments and improve their ROI.

Cloud Enablement: We give our customers the option to deploy and operate some, or all of their Enterprise applications to a public, private or hybrid cloud model, taking advantage of a predictable Operational Expenditure model. AES with SAP is a true cloud solution, subscription based, rapidly deployable, scalable and flexible.

Enterprise Experience: When it comes to investing in ERP technology, user experience is a major consideration. Our Enterprise Experience gives customers, partners and employees access to the information they need securely, from anywhere, across device platforms to boost productivity and enhance the traditional SAP user experience.

With AES with SAP, Emergys has loaded the DICE to deliver an out-of-the-box solution that can easily be configured to meet all of your business needs.

**BPP specific Value Add-Ons available for purchase. Through our 15 years of SAP implementation experience across several industries, Emergys continues to develop value added innovations across BPPs, including interfaces, dashboards and reports, which can be purchased a la carte to deliver additional functionality to your SAP solution*

AES with SAP

Delivering AES with SAP

Emergys has successfully been delivering customized SAP ERP solutions through the cloud since 2011, capitalizing on the rapid delivery and Return on Investment this deployment method provides our customers. In 2013, we devised a way to not only implement SAP Business All-in-One via the cloud, but to extend the full benefits of the cloud with a true SaaS solution.

AES with SAP can be delivered via private, public or hybrid cloud models. Our solution provides rapid installation of pre-configured SAP and Emergys best practices with HANA, Fiori and Business Objects reporting. The 14-17 week delivery model includes:

f

Training – Three week, self-paced training course on SAP, prior to Project kick-off. Training materials and support are provided by Emergys.

Implementation & Knowledge Transfer – Project implementation will be approximately 11-12 weeks from project kick-off to go-live. Implementation includes a hybrid, on-site/off-site consulting, model, with most of the delivery occurring off-site, to minimize business disruption.

Application Management Services – SAP Maintenance and Emergys Application Management Support Services to ensure solution optimization and continued innovation.

AES with SAP, allows our customers to realize the flexibility, scalability and always on capacity that a true cloud solution provides, while still delivering the comprehensive functionality for running the entire business efficiently and affordably..

Key Benefits

- OPEX vs CAPEX models
- Decreased implementation time and increased infrastructure flexibility
- Improved Enterprise User Experience providing anywhere, anytime access to information across device
- Pre-built with business intelligence, analytics and reporting capabilities to accelerate implementation and reporting execution
- Pre-configured Integration Points for SAP and other third-party enterprise applications
